Java Developer

Charter Solutions, an award-winning provider of choice for management consulting, customized web application development, and system integration is seeking senior developers/application architects who are proficient in working with clients and our project leadership staff to develop best-of-breed integration solutions and web-based applications for our clients.

Qualified candidates will have a strong background in Java/J2EE development and related technologies.

The qualified candidate will possess the following key skillsets:

- 5 years technical experience in the design, development, test, and deployment of dynamic, interactive, web-based applications.
- Demonstrated proficiency with the following technologies: Java/J2EE, JSP/Servlets, JavaBeans, Struts, Hibernate, Spring, Castor, JSF, ANT, JavaScript, XML, HTML, CSS, CVS, AJAX, Toad, MySQL, SQLPlus, Oracle 8i/9i, JDBC, JRF, JUnit, IntelliJ IDEA, Visio, JBoss, IPlanet, WebLogic, Log4J, POI, and Excel.
- Demonstrated proficiency with design patterns such as Factory pattern, Command, Delegate, Data Access Object pattern and Value Object pattern.
- Demonstrated proficiency with Oracle SQL and familiarity with both data manipulation language (DML) and data definition language (DDL).
- Experience with creating real time or batch reports using Java, SQL Stored Procedures, Unix scripts and FTP.
- Demonstrated ability to work as a consultant, including strong interpersonal, verbal, and written communication skills.
- Experience in the development of standard code sets, business rules, workflows and procedures.
- Technical project planning, design, implementation, integration, verification, validation, and deployment of web-based interactive environments.
- Experience working in a blended team environment consisting of company and client personnel.
- Assist in customer training and knowledge transfer.
